How darktable works

darktable provides a workflow that consists of the following steps.

1. Opening photos.
2. Editing photos.
3. Exporting photos.

The figure represents the workflow in detail.

1. Opening photos into the **lighttable** view **(L)** from either a storage device **(I)** or through Tethering. **(T)**.

- Viewing geotagged photos on a geographic chart **(M)**.

2. Processing photos.

- Creating HDR or editing with predefined steps **(H)**.
- Developing in the **darkroom** view **(D)**.

3. Exporting photos **(E)** to JPEG format or other format.

4. Presenting photos.

- Presenting photos in a slideshow**(S)**.
- Printing photos **(P)**.
